

Subject: Maths		Year Group: 9	Term: 1, 2 and 3
Module/Theme: Algebra			
Topic Outline & Aims (Intent) Through the algebra topics covered in Year 9 students will take the necessary steps to build on their knowledge from years 7 and 8 and become GCSE ready. The GCSE requires pupils to be proficient with basic algebra and we aim for all students to finish year 9 with the confidence and knowledge to embrace the demands of Key Stage 4. Where appropriate the learning will continue to be structured by working in the concrete and pictorial and moving onto the abstract. The year 9 algebra topics will allow students to consolidate and deepen their understanding of manipulating and solving equations and further develop their understanding of graphical representations.			
Key Skills and Knowledge taught through this topic: (Intent) <ul style="list-style-type: none"> • Expand and factorise quadratics • Solve an inequality and represent this on a number line • Solve linear inequalities where a variable is on both sides and brackets are involved • Use the equation of a straight line – $y = mx + c$ <ul style="list-style-type: none"> - Understand and solve problems involving parallel and perpendicular gradients - Find the equation of a line given 2 points and 1 point with a gradient • Interpret properties of quadratic graphs (intercept, symmetry, positive or negative, coefficients) • Identify solutions from intersecting graphs • Solve linear simultaneous equations 			
Prior Learning: (Context) <u>KS2:</u> Please see Year 7 Algebra <u>Year 7:</u> Please see Year 7 Algebra Year 8: Factorising expressions Rearranging equations Solving linear equations with x on both sides Understand $y=mx+c$	Future Learning: (Context) KS4: As above and Mathematics Programme of Study Key Stage 4 Pg7-8 Solving complex equations Solving simultaneous equations involving a linear and quadratic equation Forming and solving equations Solving equations by numerical methods Understanding quadratic equations and identifying turning points. Subject: Maths		Year Group: 9		Term: 1, 2 and 3	
Module/Theme: Geometry					
Topic Outline & Aims (Intent) During year 9 students will build upon their prior learning of geometry. Through discovery, students will be able to deepen their understanding of the properties of shapes, volume, surface area, congruence and similarity.					
Key Skills and Knowledge taught through this topic: (Intent) <ul style="list-style-type: none"> • Construct and interpret bisectors of angles and line segments • Understand and solve problems involving loci • Calculate the area and arc lengths of sectors • Calculate the area and perimeter of semi and quarter circles • Calculate the volume and surface area of cylinders • Understand, recognise and solve problems involving similarity between shapes • Understand, recognise and solve problems involving congruence of shapes 					
Prior Learning: (Context) <u>KS2:</u> Please see Year 7 Geometry Mathematics programme of study: Key Stage 2 Pg 43 – 45 <u>Year 7:</u> Please see Year 7 Geometry <u>Year 8:</u> Plans, elevations and scale drawing Alternate and corresponding angles Interior and exterior angles in polygons Circles, circumference and area Volume of cylinders		Future Learning: (Context) KS4: As above and Mathematics Programme of Study: Key Stage 4 Trigonometry Pythagoras Area of a triangle using Sin Sine Rule and Cosine Rule Circle theorems Vectors		National Curriculum Links: (Context) Mathematics Programme of Study: Key Stage 3

Subject: Maths		Year Group: 8		Term: 1, 2 and 3	
Module/Theme: Number					
Topic Outline & Aims (Intent) The Number strand of the curriculum is fundamental to successful progression through Key Stage 3. The aim in Year 9 is for students to demonstrate fluency of the fundamentals. Students will deepen their understanding of familiar numerical concepts from years 7 and 8 including negative numbers, indices, roots and standard form.					
Key Skills and Knowledge taught through this topic: (Intent) <ul style="list-style-type: none"> Apply the laws of indices to numerical and algebraic problems (including negative and fractional indices) Work competently with roots and use them to manipulate numbers Calculate with numbers written in standard form Identify bounds when a value has been rounded Understand error intervals and use these appropriately when working in context. 					
Prior Learning: (Context) KS2: Please see Year 7 Number Mathematics Programme of Study: Key Stage 2 (Page 6, 11, 18, 24, 31, 39) Year7: Please see Year 7 Number Year 8: HCF and LCM from prime factors Standard form Order of operations Negative numbers		Future Learning: (Context) KS4: Compound interest Calculating with fractional and negative indices Working with surds and recurring decimals		National Curriculum Links: (Context) Mathematics Programme of Study: Key Stage 3 (Page 5 and 6)
